'JavaScript_Node.Js_Chatbot_Developer'
.match(/[m|f]+[junior|senior]+[full|part time]+/ig)

Company description

ONDEWO develops an ON DEmand WOrld in which you can find and use within 90 min any kind of service provider - from hairdressers to cleaners to math teachers - through talking to our digital agent / chatbot on Facebook Messenger. ONDEWO was founded in June 2017 and received over 200.000 EUR in funding, selected as part of the WKO Rocket Science Program and INITS Business Accelerator Program and is now up for the finals for "Austria's Next Top Startup'. We are a team of 5 with over 14 years experience in digitization of large companies at McKinsey & Company, over 6 years of developing artificial intelligence and machine learning software, over 3 years of conversation strategy, communication and sales expertise. We are passionate to change the world.

Job Description

We are looking for a Javascript/Typescript/Node.js Developer responsible for managing the event driven, micro-service based architecture of our digital agent / chatbot. Your work will focus on creating a highly scalable cloud solution powering our conversational user interface, to develop all of the server-side logic incl. Google Firebase, a cutting-edge real-time database, and ensuring high performance and responsiveness to user requests. As part of the core product team you will collaborate closely with the artificial intelligence and conversation design team to make ONDEWO's digital agent helpful, intuitive and easy to use for our customers. Therefore, good knowledge of Javascript, TypeScript and Node.js and the willing to learn new technologies such as Elastic Search, Microsoft Cognitive Services is necessary as well.

Responsibilities

- Integration of user-facing digital agent/chatbot conversational elements developed by the artificial intelligence developers with server side logic
- Writing reusable, testable, and efficient code - we "type" everything, hence TypeScript)
- Design and implementation of low-latency and performant backend Node.JS code
- Development and maintenance of data structure and formats for Google Firebase
- Implementation of security and data protection

Skills And Qualifications

- Strong proficiency with JavaScript, Node.js and ideally TypeScript
- Understanding asynchronous programming and its quirks and workarounds
- Basic understanding of front-end technologies, such as HTML5, and CSS3
- Understanding fundamental design principles behind a scalable application
- Proficient understanding of code versioning tools, such as Git

Salary

According to "Kollektivvertrag", the monthly salary is 2.535 EUR (14x)/month (full-time). Dependent on the qualification, education and experience we offer higher salaries and employee stock options.

Why you should work for us?

We are a super fun start up that wants to disrupt the service industry through artificial intelligence, digital agents, chatbots and digital customer journeys. Our motto "work hard and play hard" with a lot of fun in the office and social activities around work.
